大家認識的日本馬印白板, 其實並不只限於常規產品的安裝。過去多年, 我們都會按客戶不同的需要和環境上的限制, 訂製不同款式和尺寸, 讓產品無論在使用上和視覺上都能融入場地所需, 成為場地設計的一部份。

Vertical Whiteboard Panels with hidden door 併合式白板牆連暗門

Size: 18000(W) x 3100(H) mm

Photo taken at The Chinese University of Hong Kong

香港中文大學 實景拍攝

The total length of the whiteboard wall is about 18 meters, made up of 15 whiteboard modules, 5 of them are built with push-button hidden doors, which are convenient for customers to use for fire equipment maintenance or electrical inspection in the future.

Customized pure white aluminium frame achieves frameless effect when viewed from the front, it is well-arranged to form a giant whiteboard wall. Each whiteboard panel is lightweighted but hard and durable, will not be deformed even for long-term use.

白板牆全長約18米, 由15塊白板模組併合而成, 當中5塊是特製按彈式暗門, 方便客戶日後進行消防設備維修或電力檢查時之用。特製純白鋁邊框和骨架, 從正面看能做到無邊框的效果, 美觀大方, 而且非常輕巧, 即使長期使用亦不會變形。

Free Standing Whiteboard Wall 自立式白板牆

Size: 6000(W) x 3100(H) mm

The first self-supporting whiteboard wall in Hong Kong with a height of 3100cm (H) x 6M (L). The uniqueness of this product lies in the fact that the whiteboard wall does not need to be attached to the wall, it is made up of 5 whiteboard panels with a height of 3.1m, the product is surrounded by white aluminium frames to strengthen the structure of the whiteboards and make the product look rigid and safety.

全港首套能做到3100cm (高) x 6M (長) 的自立式白板牆，產品獨特之處在於白板牆無須依附在牆身，由5塊高3.1米的整幅白板組合而成，配以白色鋁合金邊框圍邊，鞏固白板結構，讓產品達至美觀和安全的效果。

Large Seamless Projection Whiteboard 大型無縫投影白板

Size: 9050(W) x 1508(H)mm

On-site roll-up installation, professional design can achieve seamless, no interface effect, large projection board surface can be used with multiple projectors at the same time.

Special whiteboard surface can effectively minimize the projection reflection, and remove the so-called "Aperture", while the projected image with a gain effect, the first Virtual Classroom in Asia use the same whiteboard model. Images and writings can be clearly seen via video cam.

現場卷裝式安裝，專業的設計能做到無縫、無接口效果，特長的投影板面，能同一時間配合多部投影機使用。

白板獨特的磨沙板面，能有效地將投射反光減到最低，並去除所謂的「光圈」，同時能對投射的映像帶有增益效果，亞洲首個虛擬課室，也是採用同型號的白板，透過視像仍能清楚看到白板上的映像和文字。

Due to the limitation of the site environment, we used UMAJIRUSHI whiteboard sheet to build a borderless writing wall to client, suitable for both writing and projection use, the surface of the whiteboard sheet is magnetic, the advantages of this formula are relatively low cost, easy to install, and can be replaced at any time if there is any damage in the future.

因場地環境限制，本次工程我們採用了日本馬印白板貼來打造無邊框的書寫牆，適合書寫和投影兩用，白板貼表面有磁力，優點是成本相對低，容易安裝，日後若有損壞也可隨時更換。

Vertical Sliding Board Combo 上下升降組合板

Size: 7380(W) x 1860(H)mm, composed with 3 sets of vertical sliding board

The unique feature of UMAJIRUSHI vertical sliding board combo is that the board can stop at any point along the track. There are 2 models: wall-mounted and free-standing, customers can enjoy a doubled writing space in the limited space, suitable for the use of high ground floor places.

馬印上下升降板能在軌道上任何一點停下，產品分掛牆式和柱立式兩款，讓客戶能在有限的空間內將書寫空間增加一倍，板面可選擇常規搪瓷白板或投影搪瓷白板，適合樓底高的地方使用。

Curved Enamel Whiteboard 曲面搪瓷白板

In addition to flat whiteboards, UMAJIRUSHI can also customize curved whiteboards to meet the needs of on-site environments.

馬印除了平面的白板外，亦可按客戶需要訂製曲面白板，以附合現場環境需要。

2 in 1 Sliding Board 左右趟門組合白板

In this project, there is an electronic whiteboard on the wall, client requests for a set of door combination in front of the TV, when the TV is idle it can be hidden behind the doors. UMAJIRUSHI designed to use our Enamel whiteboard as the door instead of traditional wooden door so that client can do writing any time. We have designed a set of specialized tracks and rollers for this, even if the board weighs 50kgs, user can move smoothly along the track, and will not fall due to long time movement, safe and beautiful.

本次項目的場地牆身已有一台電子白板，按客戶要求在電視前增設一套趟門組合，當電視不使用時能用將電視隱藏起來，趟門並非採用傳統の木門，而是改為馬印的搪瓷白板，方便書寫。馬印為此設計了一套專門的趟門路軌和滾輪，即使板重 50kgs 仍能暢順移動，並且不會因長時間移動而掉落，安全美觀。
